

POEM

Stay away from discrimination

Dr. M. Azizur Rahman

Positive attitude makes us creative.
Negative attitude makes us destructive.
Affirmative attitude keeps us active,
Our country to be strong and legislative.

Law and order important to control forces of negative.
In human world discrimination is very sensitive.
Minor section may be sometimes reactive, non-creative,
The job of main stream is to make them pro-creative.

Let's make the environment normative.
We need to make the minor section productive,
To increase productivity, people need to be emotive.
Let's minimise the difference between native and non-native.

The society should be constructive and productive,
And, we will get a developed world conclusively deductive.
