

Bureaucratic Constraint

In any society, bureaucrats hold a powerful position.

They are expected to shape the government with good administration.

Bureaucrats are well trained about their responsibilities on-the-vocation.

They deal with rules & regulation and its presentation.

On business clients, bureaucrats put a bunch of restriction.

They don't care how clients suffer from their repression.

Job of bureaucrats is to help maximize output by exploration.

But, businesses incur losses for their action of exploitation.

What is unknown to society, is their bribal communication.

Most of the time bureaucrats don't care about politicians' suggestion.

Their negative action can result destruction and demolition.

Bureaucrats are expected to behave humanly with sense of proportion.

They will be obliged to listen to politicians' suggestion.

Good governance, growth and development will bring life's beautification.
