Business Management

In terms of importance, human resource comes first
To develop anything, dedication & hard work is a must,
Employ only those people who you can trust
Utilize your experience acquired in the recent past.
It is harmful if the industrial relation suffers from mistrust
However, do not let the environment to be victim of distrust,
Notify the irregular worker for job-separation as the last
Do not discriminate your employees based on the caste.
Scope of work does not have to be too vast
Machineries will be wiped regularly to free from dust,
Keeping machineries idle will suffer with full of rust
Without maintenance, machinery will have a problem of crust.
Award your efficient worker with sufficient entrust
Expert planning is important for a feasible forecast,
With negative industrial relation, working environment will burst
Inefficient management working relation of which result will be the worst.
Environment has to be congenial by the act of adequate adjust
Your environment can be free from the possible angst,
Finally, you maximize production by ceasing the possible avast.
