

Climate Change Impact and Contradiction

Climate change made Bangladesh as the country of vulnerable.

Drainage congestion is a feature as sea level becomes higher.

Global plan is important to minimize the life risk for the survivor.

International adaptors of climate change can help mitigate the impact.

For warming by use of natural fuel, people are the prime contributor.

Let the natural process go in association with possible modifier.

Man made environment and ecosystem must go from green to greener.

Climate change impact contradicts between businesses, environment or the other.

Climate change impact is discovered by the effort of human adventure.

For the climate change impact, whatever we do is a danger.

Climate does not change automatically unless we intend as a role player

It is dangerous to think, business are neither mitigator nor adapters.
