

Stay Away From Discrimination

Positive attitude makes us to be creative.

Negative attitude makes the environment destructive.

Affirmative attitude keeps us active,

For security, the country has to be strong and legislative.

Law and order is important to control negative motive.

Natives are assumed to discriminate against non-native.

Non-natives are assumed to be always reactive.

In human world, discrimination is very sensitive.

Minor section of people is reactive and so non-creative,

It is the job of main stream to make them pro-creative.

Let's make the environment normative.

We need to make the minority productive,

To increase productivity, people need to be emotive.

Let's minimize the difference between native and non-native.

The society should be constructive and productive,

So, we will get a developed world conclusively deductive.
